## CURRENT SITUATION

## Decision making table

Classification of QM Software	Application Areas for QM Software											
	Quality centre	Inspection	Process analysis	Competency	Documentation control	Location and Equipment	Management actions	OMS	Supplier management	Custom management	Risk management	Data analysis and reporting
LIMS	7, 16			7	7	7						7, 16
EDM					6, 11							
Workflow			6, 10	5	5	17	10	10, 11	17		10	5, 17
BPM			9	2	9							2, 9
E-business			13, 2				13					
Web system service	18	18	2, 14, 12, 18		4, 2, 12, 3, 18	18	4, 14, 1, 3, 15	4, 2, 14, 12, 3			14, 12, 15, 18	1
management, Intranet												
IDEF			21									21
Statistic and mathematic applications	19, 20											19, 20
Collaborative platform	22		22	22	6	22						22

2

EVALUATION COMPLIANCE  
SYSTEM

- Capable content
- Collaborative real time data
- Easy of use and deployment
- Environmental administration
- Application administration
- Scale
- Integration and compatibility
- Executive summaries and reporting

## HOW TO DO

- To identify needs
- To identify a champion.
- To create specific requirements.
- To make budget.
- To ask suppliers hard questions.
- To demand to see the product in action.
- To ask for suppliers' references.
- To verify suppliers' financial viability.

## CONCLUSION

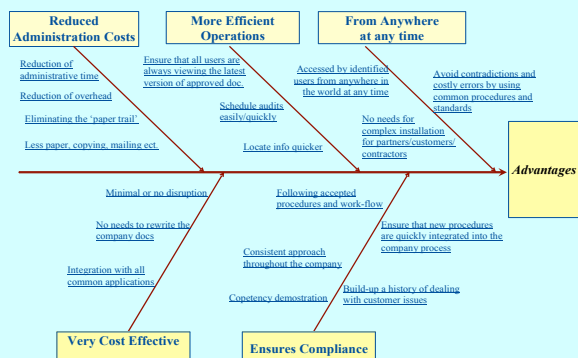

- High number of software makers
- No labeling
- No verifying bureau / data base
- No certified software specialist

So, relay on decision making scheme

Decision  
making table

## ADVANTAGES

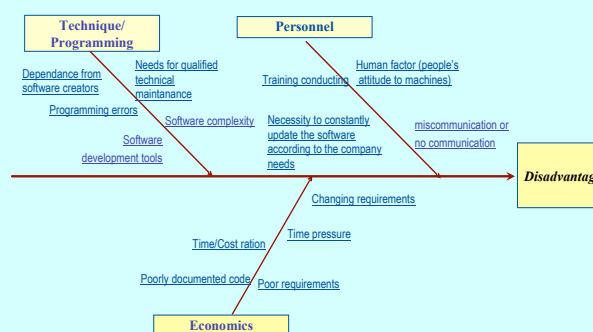

## Advantages of using QM Software

3

## DISADVANTAGES

## Disadvantages of using QM Software
