Authors :

Serge Bouchardon, Vincent Volckaert.

Presentation

Loss of grasp is a digital creation about the notions of grasp and control.

When do we feel we have a grip on our life or not ?

Six scenes feature a character who is losing grip.

At the same time, this play on grasp and loss of grasp mirrors the reader's experience of an interactive digital work.

The piece requires headphones (or loudspeakers) and a webcam (for the fifth scene).

The interaction with the piece lasts about 10 minutes.
