An innovative International School
Compiègne - France
2018
UTC, some facts and figures...

The University of Technology, Compiègne (better known as UTC) was founded in 1972.

From the very start, UTC’s unusual dual identity as both an engineering school and a university has placed it at the forefront of the higher educational scene in France. UTC’s reputation for being innovative and imaginative is just as strong now as it was 45 years ago. UTC has recently been awarded special financial bonuses as part of the French Government’s Investments for the Future programme.

UTC graduates: **21,000**

UTC graduates’ average time-to-recruitment: **1 month**
An innovative international school

There will be 3 different types of modular course:

**Module 1  Intensive French language training**
(July 3-28 / July 31-August 25, 2017) including technico-cultural outings each Wednesday.

**Module 2  Laboratory placements in:**
- **Bioeconomy**: production of renewable biological resources and their conversion into food, feed, bio-based products and bioenergy. Domains covered are agriculture, forestry, fisheries, food, pulp and paper production, as well as parts of the chemical, biotechnological and energy industries and their respective service areas.
- **Intelligent Mobility**: interconnections between a range of different industries and technologies (vehicle manufacturing, electronic sensors and controls, transport information systems, communications technologies, logistics and distribution, infrastructure management).
- **Health Technology**: the application of organized knowledge and skills (including in mechanics, electronics, computer science, and physiology) in the shape of devices, medicines, procedures and systems developed to improve health and improve the quality of life. Domains of application in the lab: musculo-skeletal systems, cardiovascular system, artificial organs, and biomaterials.

Timetables, to be scheduled between the middle of May and the end of July, will depend on the subjects chosen. Participants will carry out a short research project in one of UTC’s laboratories.

**Module 3  Science and culture seminars**
“**Culinary science for tastier, healthier food**” international school
(July 16-27, 2018) including technico-cultural outings each Wednesday.

This two-week summer school is an innovative combination of food science, nutrition and French gastronomy. The latest trends and knowledge in gastronomy science will be addressed theoretically, and directly applied to the preparation of famous French dishes and desserts in cooking workshops on our culinary platform. Knowledge acquired during a first week devoted to the texture of food will then be used to enhance the nutritional profile of dishes. Innovative techniques will be used to produce healthier versions of well-known French specialities.

Applications can be made for one, two or three modules.
**Dates**
Between mid-May and the end of August 2018

**Deadline**
Applications must be received by April 30, 2018

**Applications**
The application file can be downloaded at: https://www.utc.fr/international/ecoles-dete.html

**Cost**
€ 2500 * for Module 1 including accommodation (4 weeks in July or August) /
€ 1250€* for Module 3 including accommodation

*Scholarships are possible
